Hey Keith,

I will make these edits and record a video today. Let me know if you'd like to connect before, or after I have the submission ready.

Best,  
Mike

Hey Keith,

Sorry about the tardiness, I've been with family this weekend, let me see if Mike has a second to take a look this evening at the notes and adjust the choice of the third track with the addition of your notes below.

Regarding the two minute video, I'm sure we can throw something together in the morning.

Best,

Charles

Charles --

Reminder re tomorrow 1/12 JAN 12p deadline for Create+AI Challenge submittal.

I reviewed the document again yesterday and noted a few areas for edits...

Due to internal university politics, it is best to remove as listed the DOERR SCHOOL FOR SUSTAINABILITY.

## OVERVIEW

### TEAM

Stanford Credentials

"Active Connections" - Stanford Technology Ventures Program, Stanford GSB Center for Social Innovation, TomKat Center for Sustainable Energy, Stanford Alumni in AI

--

## TRACK 3

Stanford Affiliation:

"Active Leadership" in Stanford Angels & Entrepreneurs, TomKat Center for Sustainable Energy, Stanford Technology Ventures Program -- connecting entrepreneurs with investors and mentorship platforms

--

**"Relevant Experiences"** - Alta Sea Partnership - Public-private partnership convening organizations in science, business, education and career pathways

--

## AI Studio Teams Role

Oversee district/workforce alignment and credential validation

--

Open to go over the final review later today or early morning. (note: 2 min video requirement)

Keith

Charles --

Here is the Stanford Graduate School of Education -- School's *In* podcast we talked about that you wanted to see.

<https://ed.stanford.edu/news/preparing-students-automated-future>

There may be themes here to incorporate in our language for the *Create+AI Challenge* submittal: farm system, interdisciplinary practice, nurturing human potential.

Key: highlighting how our project "puts educators and learners at the heart of AI design -- ensuring these tools expand access, agency, and connection, and in turn advance learning, well-being, and opportunity."

Our proposal is definitive and comprehensive -- well done! As discussed, **Track 3: Augment Career** provides us with a framework that touches related partnership and project interests -- think tanks: BizFed Institute, Milken Institute, Aspen Institute; Community Colleges & Universities: Southwest College, SMC, LACC, USC Center for Economic Development/University

Center: Advanced Manufacturing Partnership Network, Stanford, etc.; Gov't Workforce Development programs: City of LA Workforce Investment Board, etc.

Let's secure a time to review *Create+AI* 'submission criteria and proposal PDF list.' For example, what are our thoughts re the required 2 min video?

Keith
